

The Tiny Castle

T. Walker

The castle was smaller than most castles. Way smaller in fact.

The castle was as big as a person. The inhabitants were tiny too.

One day in the castle, in the Small Land of the Insignificant Kingdom, the king wanted to expand his small castle. But first, he had to eat dinner.

The people outside of the castle were not so lucky, because they had to expand the castle.

So, they built more rooms, halls, and bedrooms, until the castle was huge! (The size of a real castle!) They had to expand the Kingdom, because the castle was too big!
